

[MS-OFFDI]: Microsoft Office File Format Documentation Introduction

Intellectual Property Rights Notice for Open Specifications Documentation

- **Technical Documentation.** Microsoft publishes Open Specifications documentation for protocols, file formats, languages, standards as well as overviews of the interaction among each of these technologies.
- **Copyrights.** This documentation is covered by Microsoft copyrights. Regardless of any other terms that are contained in the terms of use for the Microsoft website that hosts this documentation, you may make copies of it in order to develop implementations of the technologies described in the Open Specifications and may distribute portions of it in your implementations using these technologies or your documentation as necessary to properly document the implementation. You may also distribute in your implementation, with or without modification, any schema, IDL's, or code samples that are included in the documentation. This permission also applies to any documents that are referenced in the Open Specifications.
- **No Trade Secrets.** Microsoft does not claim any trade secret rights in this documentation.
- **Patents.** Microsoft has patents that may cover your implementations of the technologies described in the Open Specifications. Neither this notice nor Microsoft's delivery of the documentation grants any licenses under those or any other Microsoft patents. However, a given Open Specification may be covered by Microsoft [Open Specification Promise](#) or the [Community Promise](#). If you would prefer a written license, or if the technologies described in the Open Specifications are not covered by the Open Specifications Promise or Community Promise, as applicable, patent licenses are available by contacting iplg@microsoft.com.
- **Trademarks.** The names of companies and products contained in this documentation may be covered by trademarks or similar intellectual property rights. This notice does not grant any licenses under those rights. For a list of Microsoft trademarks, visit www.microsoft.com/trademarks.
- **Fictitious Names.** The example companies, organizations, products, domain names, e-mail addresses, logos, people, places, and events depicted in this documentation are fictitious. No association with any real company, organization, product, domain name, email address, logo, person, place, or event is intended or should be inferred.

Reservation of Rights. All other rights are reserved, and this notice does not grant any rights other than specifically described above, whether by implication, estoppel, or otherwise.

Tools. The Open Specifications do not require the use of Microsoft programming tools or programming environments in order for you to develop an implementation. If you have access to Microsoft programming tools and environments you are free to take advantage of them. Certain Open Specifications are intended for use in conjunction with publicly available standard specifications and network programming art, and assumes that the reader either is familiar with the aforementioned material or has immediate access to it.

Revision Summary

Date	Revision History	Revision Class	Comments
03/18/2009	1.0	Major	Initial Availability
07/13/2009	1.01	Major	Changes made for template compliance
08/28/2009	1.02	Editorial	Revised and edited the technical content
11/06/2009	1.03	Editorial	Revised and edited the technical content
02/19/2010	2.0	Editorial	Revised and edited the technical content
03/31/2010	2.01	Editorial	Revised and edited the technical content
04/30/2010	2.02	Editorial	Revised and edited the technical content
06/07/2010	2.03	Editorial	Revised and edited the technical content
06/29/2010	2.04	Editorial	Changed language and formatting in the technical content.
07/23/2010	2.04	No change	No changes to the meaning, language, or formatting of the technical content.
09/27/2010	2.04	No change	No changes to the meaning, language, or formatting of the technical content.
11/15/2010	2.04	No change	No changes to the meaning, language, or formatting of the technical content.
12/17/2010	2.04	No change	No changes to the meaning, language, or formatting of the technical content.
03/18/2011	2.04	No change	No changes to the meaning, language, or formatting of the technical content.
06/10/2011	2.04	No change	No changes to the meaning, language, or formatting of the technical content.
01/20/2012	2.04	No change	No changes to the meaning, language, or formatting of the technical content.
04/11/2012	2.04	No change	No changes to the meaning, language, or formatting of the technical content.
07/16/2012	2.5	Minor	Clarified the meaning of the technical content.
10/08/2012	2.6	Minor	Clarified the meaning of the technical content.
02/11/2013	2.6	No change	No changes to the meaning, language, or formatting of the technical content.
07/30/2013	2.7	Minor	Clarified the meaning of the technical content.
11/18/2013	2.8	Minor	Clarified the meaning of the technical content.

1 Introduction

This document introduces the persistence formats that are primarily used by the following product versions:

- Microsoft Excel 97
- Microsoft Excel 2000
- Microsoft Excel 2002
- Microsoft Office Excel 2003
- Microsoft Office Excel 2007
- Microsoft Excel 2010
- Microsoft Excel 2013
- Microsoft PowerPoint 97
- Microsoft PowerPoint 2000
- Microsoft PowerPoint 2002
- Microsoft Office PowerPoint 2003
- Microsoft Office PowerPoint 2007
- Microsoft PowerPoint 2010
- Microsoft PowerPoint 2013
- Microsoft Word 97
- Microsoft Word 2000
- Microsoft Word 2002
- Microsoft Office Word 2003
- Microsoft Office Word 2007
- Microsoft Word 2010
- Microsoft Word 2013

Each format consists of a set of data structures to which applications can read or write data, typically by writing a conforming stream of bytes to a file system as a stand-alone file.

In addition to introducing the persistence formats that are primarily used by these product versions, this document identifies related documents and specifications that provide more information about each format and how each format is implemented in each product version.

1.1 Glossary

The following terms are defined in [\[MS-OFCGLOS\]](#):

animation
document template
drawing object
embedded object
formula
presentation
slide
slide show
table
template
workbook
XML schema

The following terms are specific to this document:

MAY, SHOULD, MUST, SHOULD NOT, MUST NOT: These terms (in all caps) are used as described in [\[RFC2119\]](#). All statements of optional behavior use either MAY, SHOULD, or SHOULD NOT.

1.2 References

References to Microsoft Open Specifications documentation do not include a publishing year because links are to the latest version of the documents, which are updated frequently. References to other documents include a publishing year when one is available.

1.2.1 Normative References

We conduct frequent surveys of the normative references to assure their continued availability. If you have any issue with finding a normative reference, please contact dochelp@microsoft.com. We will assist you in finding the relevant information. Please check the archive site, <http://msdn2.microsoft.com/en-us/library/E4BD6494-06AD-4aed-9823-445E921C9624>, as an additional source.

2 Microsoft Word Persistence Formats

Microsoft Word supports primarily four file formats:

- Word Binary File Format, as specified in [\[MS-DOC\]](#)
- Ecma Office Open XML File Format, as specified in [\[ECMA-376\]](#)
- Office Open XML File Format, as specified in [\[ISO/IEC29500:2011\]](#)
- Open Document Format for Office Applications (OpenDocument), as specified in [\[ODF\]](#) and [\[ODF1.2\]](#)

2.1 Word Binary File Format

2.1.1 Applicability

The Word Binary File Format, as specified in [\[MS-DOC\]](#), is a persistence format that supports word-processing tasks for content in documents and **document templates (1)**. These tasks include authoring and manipulating text, images, **tables**, and the layout of pages, and managing custom **XML schemas** that are associated with document content.

The Word Binary File Format is applicable to document content that is intended to flow across a set of pages and might be printed. It is also applicable to content that is to be presented as a stand-alone document or is contained within other documents as an **embedded object**, as specified in [\[MS-OLEDS\]](#).

The Word Binary File Format is not applicable to content that is to be presented across various media and devices as an exact reproduction of a specific representation of that content.

2.1.2 Application and Versions

Users can create, open, or save files that conform to the Word Binary File Format, as specified in [\[MS-DOC\]](#), by using Microsoft Word 2013, Microsoft Word 2010, Microsoft Office Word 2007, Microsoft Office Word 2003, Microsoft Word 2002, Microsoft Word 2000, or Microsoft Word 97.

2.1.3 File Name Extensions

The following table lists file name extensions and descriptions of files that conform to the Word Binary File Format, as specified in [\[MS-DOC\]](#), and were created by using a product version identified in section [2.1.2](#).

File name extension	Typical usage
.doc	Microsoft Office Word 2003, Microsoft Word 2002, Microsoft Word 2000, or Microsoft Word 97 document
.dot	Office Word 2003, Word 2002, Word 2000, or Word 97 document template (1)

2.2 Ecma Office Open XML Document

2.2.1 Applicability

The Ecma Office Open XML File Format, as specified in [\[ECMA-376\]](#), is a persistence format that supports the same types of word-processing tasks described in section [2.1.1](#). It additionally provides the following benefits:

- Improved interoperability and business process integration – The XML-based architecture and approval of the format as an international standard help ensure interoperability and integration between documents and technologies.
- Long-term archival protection – The format is documented and maintained by Ecma International instead of a single, specific vendor.

2.2.2 Application and Versions

By using Microsoft Word 2010 or Microsoft Word 2013, users can open document files that conform to the Ecma Office Open XML File Format, as specified in [\[ECMA-376\]](#).

Users can create, open, or save conforming document files by using Microsoft Office Word 2007 Service Pack 2, Microsoft Office Word 2007 Service Pack 1, or Microsoft Office Word 2007. In addition, if they install the Microsoft Office Compatibility Pack, as described in [\[MSDN-COMPAC\]](#), users can create, open, or save conforming document files by using Microsoft Office Word 2003 Service Pack 1, Microsoft Word 2002 Service Pack 3, or Microsoft Word 2000 Service Pack 3.

2.2.3 File Name Extensions

The following table lists file name extensions and descriptions of files that conform to the Ecma Office Open XML File Format, as specified in [\[ECMA-376\]](#) and pursuant to the implementation notes that are cited in section [2.2.4](#) of this document, and were created by using a product version identified in section [2.2.2](#).

File name extension	Typical usage
.docx	Microsoft Office Word 2007 XML-based document
.docm	Office Word 2007 macro-enabled document
.dotx	Office Word 2007 XML-based document template (1)

2.2.4 Reference Information

The Ecma Office Open XML File Format is specified in [\[ECMA-376\]](#). That specification includes relevant normative text, markup samples, informative notes, and the associated schemas for the format. The associated schemas are available in XML schema (.xsd) format and Relax NG (.rng) format, which is described in [\[RELAXNG\]](#).

Implementation notes for the 2007 Microsoft Office system implementation of the Ecma Office Open XML File Format, as specified in [\[ECMA-376\]](#), are described in [\[MS-OE376\]](#). These notes describe how the 2007 Office system applications implement the format and they are organized according to sections of the Ecma Office Open XML File Format specification.

2.3 Office Open XML Document

2.3.1 Applicability

The Office Open XML File Format, as specified in [\[ISO/IEC29500:2011\]](#), is a persistence format that supports the same types of word-processing tasks described in section [2.1.1](#). It additionally provides the following benefits:

- Improved interoperability and business process integration – The XML-based architecture and approval of the format as an international standard help ensure interoperability and integration between documents and technologies.
- Long-term archival protection – The format is documented and maintained by the International Organization for Standardization (ISO) instead of a single, specific vendor.

2.3.2 Application and Versions

By using Microsoft Word 2010 or Microsoft Word 2013, users can create, open, or save document files that conform to the Office Open XML File Format, as specified in [\[ISO/IEC29500:2011\]](#) and pursuant to the implementation notes that are cited in section [2.3.4](#) of this document.

2.3.3 File Name Extensions

The following table lists file name extensions and descriptions of files that conform to the Office Open XML File Format, as specified in [\[ISO/IEC29500:2011\]](#) and pursuant to the implementation notes that are cited in section [2.3.4](#) of this document, and were created by using a product version identified in section [2.3.2](#).

File name extension	Typical usage
.docx	Microsoft Word 2010 XML-based document
.docm	Word 2010 macro-enabled document
.dotx	Word 2010 XML-based document template (1)

2.3.4 Reference Information

The Office Open XML File Format is specified in [\[ISO/IEC29500:2011\]](#). That specification includes relevant normative text, markup samples, informative notes, and associated schemas for the format. The associated schemas are available in XML schema (.xsd) format and Relax NG (.rng) format, which is described in [\[RELAXNG\]](#).

Implementation notes for the Microsoft Office 2010 and Microsoft Office 2013 implementations of the Office Open XML File Format, as specified in [\[ISO/IEC29500:2011\]](#), are described in [\[MS-OI29500\]](#). These notes describe how Office 2010 and Microsoft Office 2013 applications implement the format and they are organized according to sections of the Office Open XML File Format specification.

2.4 OpenDocument Text Document

2.4.1 Applicability

The Open Document Format for Office Applications (OpenDocument), as specified in [\[ODF\]](#) and [\[ODF1.2\]](#), is an appropriate persistence format for performing word-processing tasks with

documents that might need to be viewed or edited by using other applications or technologies that implement the OpenDocument format.

2.4.2 Application and Versions

By using Microsoft Word 2010 or Microsoft Office Word 2007 Service Pack 2, users can create, open, or save document files that conform to the OpenDocument format, as specified in [\[ODF\]](#) and pursuant to the implementation notes that are cited in section [2.4.4](#) of this document.

Using Microsoft Word 2013, users can open document files that conform to the OpenDocument format, as specified in [\[ODF\]](#) and create, open, or save document files that conform to the OpenDocument format, as specified in [\[ODF1.2\]](#), and pursuant to the implementation notes that are cited in section [2.4.4](#) of this document. Using Word 2013, if a document file conforms to the OpenDocument format, as specified in [\[ODF\]](#), is modified, it will be saved as the OpenDocument format, as specified in [\[ODF1.2\]](#).

2.4.3 File Name Extensions

Document files that conform to the OpenDocument format, as specified in [\[ODF\]](#) and [\[ODF1.2\]](#) and pursuant to the implementation notes that are cited in section [2.4.4](#) of this document, and were created by using a product version identified in section [2.4.2](#) typically have an .odt (OpenDocument format document) file name extension.

2.4.4 Reference Information

The OpenDocument format is specified in [\[ODF\]](#) and [\[ODF1.2\]](#). That specification includes relevant normative text and informative notes. It also provides the associated schema in Relax NG (.rng) format, which is described in [\[RELAXNG\]](#).

Implementation notes for the Microsoft Office 2013 implementation of the OpenDocument format are described in [\[MS-OODF3\]](#). Implementation notes for the Microsoft Office 2007 Service Pack 2 (SP2) implementation of the OpenDocument format are described in [\[MS-OODF\]](#). These notes describe how Office 2010, Microsoft Office 2013 and Office 2007 SP2 applications implement the format and they are organized according to sections of the OpenDocument format specifications.

3 Microsoft Excel Persistence Formats

Microsoft Excel supports primarily five file formats:

- Excel Binary File Format, as specified in [\[MS-XLS\]](#)
- Office Excel 2007 Binary File Format, as specified in [\[MS-XLSB\]](#)
- Ecma Office Open XML File Format, as specified in [\[ECMA-376\]](#)
- Office Open XML File Format, as specified in [\[ISO/IEC29500:2011\]](#)
- Open Document Format for Office Applications (OpenDocument), as specified in [\[ODF\]](#) or [\[ODF1.2\]](#)

3.1 Excel Binary File Format

3.1.1 Applicability

The Excel Binary File Format, as specified in [\[MS-XLS\]](#), is a persistence format that supports authoring and manipulating content in **workbooks** and workbook **templates**. This content can include unstructured or semi-structured tables of numbers, text, and combinations of numbers and text, in addition to **formulas**, connections to external data sources, charts, and images.

The Excel Binary File Format is applicable to content that has a grid-based layout, including content that contains numeric data, structured data, and formulas. It is also applicable to content that is to be presented as a stand-alone workbook or is contained within other documents as an embedded object, as specified in [\[MS-OLEDS\]](#).

3.1.2 Application and Versions

Users can create, open, or save workbook files that conform to the Excel Binary File Format, as specified in [\[MS-XLS\]](#), by using Microsoft Excel 2013, Microsoft Excel 2010, Microsoft Office Excel 2007, Microsoft Office Excel 2003, Microsoft Excel 2002, Microsoft Excel 2000, or Microsoft Excel 97.

3.1.3 File Name Extensions

The following table lists file name extensions and descriptions of files that conform to the Excel Binary File Format, as specified in [\[MS-XLS\]](#), and were created by using a product version identified in section [3.1.2](#).

File name extension	Typical usage
.xls	Microsoft Office Excel 2003, Microsoft Excel 2002, Microsoft Excel 2000, or Microsoft Excel 97 workbook
.xlt	Office Excel 2003, Excel 2002, Excel 2000, or Excel 97 workbook template

3.2 Office Excel 2007 Binary File Format

3.2.1 Applicability

The Office Excel 2007 Binary File Format, as specified in [\[MS-XLSB\]](#), is a persistence format that supports the same types of tasks described in section [3.1.1](#). It is applicable to content that has a

grid-based layout, including content that contains numeric data, structured data, and formulas. It is also applicable to content that is to be presented as a stand-alone workbook or is contained within other documents as an embedded object, as specified in [\[MS-OLEDS\]](#).

3.2.2 Application and Versions

By using Microsoft Excel 2010, Microsoft Excel 2013, or Microsoft Office Excel 2007, users can create, open, or save workbook files that conform to the Office Excel 2007 Binary File Format, as specified in [\[MS-XLSB\]](#). In addition, if they install the Microsoft Office Compatibility Pack, as described in [\[MSDN-COMPAC\]](#), users can create, open, or save conforming workbook files by using Microsoft Office Excel 2003 Service Pack 1, Microsoft Excel 2002 Service Pack 3, or Microsoft Excel 2000 Service Pack 3.

3.2.3 File Name Extensions

Workbook files that conform to the Office Excel 2007 Binary File Format, as specified in [\[MS-XLSB\]](#), and were created by using a product version identified in section [3.2.2](#) typically have an .xlsb (Excel 2007 binary workbook) file name extension.

3.3 Ecma Office Open XML Spreadsheet

3.3.1 Applicability

The Ecma Office Open XML File Format, as specified in [\[ECMA-376\]](#), is an appropriate persistence format for spreadsheets that require the functionality described in section [3.1.1](#), as specified in [\[MS-XLS\]](#). It additionally provides the following benefits:

- Standard syntax – The format uses a documented, standard syntax for formulas in spreadsheets.
- Improved interoperability and business process integration – The XML-based architecture and approval of the format as an international standard help ensure interoperability and integration between documents and technologies.
- Long-term archival protection – The format is documented and maintained by Ecma International instead of a single, specific vendor.

3.3.2 Application and Versions

By using Microsoft Excel 2010 or Microsoft Excel 2013, users can open spreadsheet files that conform to the Ecma Office Open XML File Format, as specified in [\[ECMA-376\]](#).

Users can create, open, or save conforming spreadsheet files by using Microsoft Office Excel 2007 Service Pack 2, Microsoft Office Excel 2007 Service Pack 1, or Microsoft Office Excel 2007. In addition, if they install the Microsoft Office Compatibility Pack, as described in [\[MSDN-COMPAC\]](#), users can create, open, or save conforming spreadsheet files by using Microsoft Office Excel 2003 Service Pack 1, Microsoft Excel 2002 Service Pack 3, or Microsoft Excel 2000 Service Pack 3.

3.3.3 File Name Extensions

The following table lists file name extensions and descriptions of files that conform to the Ecma Office Open XML File Format, as specified in [\[ECMA-376\]](#) and pursuant to the implementation notes that are cited in section [3.3.4](#) of this document, and were created by using a product version identified in section [3.3.2](#).

File name extension	Typical usage
.xlsx	Microsoft Office Excel 2007 XML-based workbook
.xlsm	Office Excel 2007 macro-enabled workbook
.xltx	Office Excel 2007 XML-based workbook template

3.3.4 Reference Information

The Ecma Office Open XML File Format is specified in [\[ECMA-376\]](#). That specification includes relevant normative text, markup samples, informative notes, and the associated schemas for the format. The associated schemas are available in XML schema (.xsd) format and Relax NG (.rng) format, which is described in [\[RELAXNG\]](#).

Implementation notes for the 2007 Microsoft Office system implementation of the Ecma Office Open XML File Format, as specified in [\[ECMA-376\]](#), are described in [\[MS-OE376\]](#). These notes describe how the 2007 Office system applications implement the format and they are organized according to sections of the Ecma Office Open XML File Format specification.

3.4 Office Open XML Spreadsheet

3.4.1 Applicability

The Office Open XML File Format, as specified in [\[ISO/IEC29500:2011\]](#), is an appropriate persistence format for spreadsheets that require the functionality described in section [3.1.1](#), and the interoperability and archival benefits of using an open, standard format. It additionally provides the following benefits:

- Standard syntax – The format uses a documented, standard syntax for formulas in spreadsheets.
- Improved interoperability and business process integration – The XML-based architecture and approval of the format as an international standard help ensure interoperability and integration between documents and technologies.
- Long-term archival protection – The format is documented and maintained by the International Organization for Standardization (ISO) instead of a single, specific vendor.

3.4.2 Applications and Versions

By using Microsoft Excel 2010 or Microsoft Excel 2013, users can create, open, and save spreadsheet files that conform to the Office Open XML File Format, as specified in [\[ISO/IEC29500:2011\]](#) and pursuant to the implementation notes that are cited in section [3.4.4](#) of this document.

3.4.3 File Name Extensions

The following table lists file name extensions and descriptions of files that conform to the Office Open XML File Format, as specified in [\[ISO/IEC29500:2011\]](#) and pursuant to the implementation notes that are cited in section [3.4.4](#) of this document, and were created by using a product version identified in section [3.4.2](#).

File name extension	Typical usage
.xlsx	Microsoft Excel 2010 XML-based workbook

File name extension	Typical usage
.xlsm	Excel 2010 macro-enabled workbook
.xltx	Excel 2010 XML-based workbook template

3.4.4 Reference Information

The Office Open XML File Format is specified in [\[ISO/IEC29500:2011\]](#). That specification includes relevant normative text, markup samples, informative notes, and associated schemas for the format. The associated schemas are available in XML schema (.xsd) format and Relax NG (.rng) format, which is described in [\[RELAXNG\]](#).

Implementation notes for the Microsoft Office 2010 and Microsoft Office 2013 implementations of the Office Open XML File Format, as specified in [\[ISO/IEC29500:2011\]](#), are described in [\[MS-OI29500\]](#). These notes describe how Office 2010 and Microsoft Office 2013 applications implement the format and they are organized according to sections of the Office Open XML File Format specification.

3.5 OpenDocument Spreadsheet Document

3.5.1 Applicability

The Open Document Format for Office Applications (OpenDocument), as specified in [\[ODF\]](#) and [\[ODF1.2\]](#), is an appropriate persistence format for performing tasks with spreadsheets that might need to be viewed or edited by using other applications or technologies that implement the OpenDocument format.

3.5.2 Application and Versions

By using Microsoft Excel 2010 or Microsoft Office Excel 2007 Service Pack 2, users can create, open, or save spreadsheet files that conform to the OpenDocument format, as specified in [\[ODF\]](#) and pursuant to the implementation notes that are cited in section [3.5.4](#) of this document.

By using Microsoft Excel 2013, users can open spreadsheet files that conform to the OpenDocument format, as specified in [\[ODF\]](#) and create, open, or save spreadsheet files that conform to the OpenDocument format, as specified in [\[ODF1.2\]](#), and pursuant to the implementation notes that are cited in section [3.5.4](#) of this document. By using Excel 2013, if a document file that conforms to the OpenDocument format, as specified in [\[ODF\]](#), is modified, it will be saved as the OpenDocument format, as specified in [\[ODF1.2\]](#).

3.5.3 File Name Extensions

Spreadsheet files that conform to the OpenDocument format, as specified in [\[ODF\]](#) and [\[ODF1.2\]](#) and pursuant to the implementation notes that are cited in section [3.5.4](#) of this document, and were created by using a product version identified in section [3.5.2](#) typically have an .ods (OpenDocument format spreadsheet) file name extension.

3.5.4 Reference Information

The OpenDocument format is specified in [\[ODF\]](#) and [\[ODF1.2\]](#). That specification includes relevant normative text and informative notes. It also provides the associated schema in Relax NG (.rng) format, which is described in [\[RELAXNG\]](#).

Implementation notes for the Microsoft Office 2013 implementation of the OpenDocument format are described in [\[MS-OODF3\]](#). Implementation notes for the Microsoft Office 2007 Service Pack 2 (SP2) implementation of the OpenDocument format are described in [\[MS-OODF\]](#). These notes describe how Office 2010, Microsoft Office 2013, and Office 2007 SP2 applications implement the format and they are organized according to sections of the OpenDocument format specification.

4 Microsoft PowerPoint Persistence Formats

Microsoft PowerPoint supports primarily four file formats:

- PowerPoint Binary File Format, as specified in [\[MS-PPT\]](#)
- Ecma Office Open XML File Format, as specified in [\[ECMA-376\]](#)
- Office Open XML File Format, as specified in [\[ISO/IEC29500:2011\]](#)
- Open Document Format for Office Applications (OpenDocument), as specified in [\[ODF\]](#) and [\[ODF1.2\]](#)

4.1 PowerPoint Binary File Format

4.1.1 Applicability

The PowerPoint Binary File Format, as specified in [\[MS-PPT\]](#), is a persistence format that supports tasks for authoring and manipulating content in **presentations** and presentation templates. Such content includes **slides**, **drawing objects**, text, images, transitions, and **animations**.

The PowerPoint Binary File Format is applicable when the primary format for presentation content is electronic. It is also applicable to content that is to be presented as a stand-alone document or is contained within other documents as an embedded object, as specified in [\[MS-OLEDS\]](#).

4.1.2 Application and Versions

Users can create, open, or save files that conform to the PowerPoint Binary File Format, as specified in [\[MS-PPT\]](#), by using Microsoft PowerPoint 2013, Microsoft PowerPoint 2010, Microsoft Office PowerPoint 2007, Microsoft Office PowerPoint 2003, Microsoft PowerPoint 2002, Microsoft PowerPoint 2000, or Microsoft PowerPoint 97.

4.1.3 File Name Extensions

The following table lists file name extensions and descriptions of files that conform to the PowerPoint Binary File Format, as specified in [\[MS-PPT\]](#), and were created by using a product version identified in section [4.1.2](#).

File name extension	Typical usage
.ppt	Microsoft Office PowerPoint 2003, Microsoft PowerPoint 2000, or Microsoft PowerPoint 97 presentation
.pot	Office PowerPoint 2003, PowerPoint 2000, or PowerPoint 97 presentation template
.pps	Office PowerPoint 2003, PowerPoint 2000, or PowerPoint 97 slide show

4.2 Ecma Office Open XML Presentation

4.2.1 Applicability

The Ecma Office Open XML File Format, as specified in [\[ECMA-376\]](#), is an appropriate persistence format for presentation content that requires the functionality described in section [4.1.1](#). It additionally provides the following benefits:

- Improved interoperability and business process integration – The XML-based architecture and approval of the format as an international standard help ensure interoperability and integration between documents and technologies.
- Long-term archival protection – The format is documented and maintained by Ecma International instead of a single, specific vendor.

4.2.2 Application and Versions

By using Microsoft PowerPoint 2010 or Microsoft PowerPoint 2013, users can open presentation files that conform to the Ecma Office Open XML File Format, as specified in [\[ECMA-376\]](#).

Users can create, open, or save conforming presentation files by using Microsoft Office PowerPoint 2007 Service Pack 2, Microsoft Office PowerPoint 2007 Service Pack 1, or Microsoft Office PowerPoint 2007. In addition, if they install the Microsoft Office Compatibility Pack, as described in [\[MSDN-COMPAC\]](#), users can create, open, and save conforming presentation files by using Microsoft Office PowerPoint 2003 Service Pack 1, Microsoft PowerPoint 2002 Service Pack 3, or Microsoft PowerPoint 2000 Service Pack 3.

4.2.3 File Name Extensions

The following table lists file name extensions and descriptions of files that conform to the Ecma Office Open XML File Format, as specified in [\[ECMA-376\]](#) and pursuant to the implementation notes that are cited in section [4.2.4](#) of this document, and were created by using a product version identified in section [4.2.2](#).

File name extension	Typical usage
.pptx	Microsoft Office PowerPoint 2007 XML-based presentation
.pptm	Office PowerPoint 2007 macro-enabled presentation
.potx	Office PowerPoint 2007 XML-based presentation template
.ppsx	Office PowerPoint 2007 XML-based slide show

4.2.4 Reference Information

The Ecma Office Open XML File Format is specified in [\[ECMA-376\]](#). That specification includes relevant normative text, markup samples, informative notes, and the associated schemas for the format. The associated schemas are available in XML schema (.xsd) format and Relax NG (.rng) format, which is described in [\[RELAXNG\]](#).

Implementation notes for the 2007 Microsoft Office system implementation of the Ecma Office Open XML File Format, as specified in [\[ECMA-376\]](#), are described in [\[MS-OE376\]](#). These notes describe how the 2007 Office system applications implement the format and they are organized according to sections of the Ecma Office Open XML File Format specification.

4.3 Office Open XML Presentation

4.3.1 Applicability

The Office Open XML File Format, as specified in [\[ISO/IEC29500:2011\]](#), is an appropriate persistence format for presentation content that requires the functionality described in section [4.1.1](#). It additionally provides the following benefits:

- Improved interoperability and business process integration – The XML-based architecture and approval of the format as an international standard help ensure interoperability and integration between documents and technologies.
- Long-term archival protection – The format is documented and maintained by the International Organization for Standardization (ISO) instead of a single, specific vendor.

4.3.2 Application and Versions

By using Microsoft PowerPoint 2010 or Microsoft PowerPoint 2013, users can create, open, or save presentation files that conform to the Office Open XML File Format, as specified in [\[ISO/IEC29500:2011\]](#) and pursuant to the implementation notes that are cited in section [4.2.4](#) of this document.

4.3.3 File Name Extensions

The following table lists file name extensions and descriptions of files that conform to the Office Open XML File Format, as specified in [\[ISO/IEC29500:2011\]](#) and pursuant to the implementation notes that are cited in section [4.3.4](#) of this document, and were created by using a product version identified in section [4.3.2](#).

File name extension	Typical usage
.pptx	Microsoft PowerPoint 2010 XML-based presentation
.pptm	PowerPoint 2010 macro-enabled presentation
.potx	PowerPoint 2010 XML-based presentation template
.ppsx	PowerPoint 2010 XML-based slide show

4.3.4 Reference Information

The Office Open XML File Format is specified in [\[ISO/IEC29500:2011\]](#). That specification includes relevant normative text, markup samples, informative notes, and the associated schemas. The associated schemas are available in XML schema (.xsd) format and Relax NG (.rng) format, which is described in [\[RELAXNG\]](#).

Implementation notes for the Microsoft Office 2010 and Microsoft Office 2013 implementations of the Office Open XML File Format, as specified in [\[ISO/IEC29500:2011\]](#), are described in [\[MS-OI29500\]](#). These notes describe how Office 2010 and Microsoft Office 2013 applications implement the format and they are organized according to sections of the Office Open XML File Format specification.

4.4 OpenDocument Presentation Document

4.4.1 Applicability

The Open Document Format for Office Applications (OpenDocument), as specified in [\[ODF\]](#) and [\[ODF1.2\]](#), is an appropriate persistence format for presentations that might need to be viewed or edited by using other applications or technologies that implement the OpenDocument format.

4.4.2 Application and Versions

By using Microsoft PowerPoint 2010 or Microsoft Office PowerPoint 2007 Service Pack 2, users can create, open, or save presentation files that conform to the OpenDocument format, as specified in [\[ODF\]](#) and pursuant to the implementation notes that are cited in section [4.4.4](#) of this document.

By using Microsoft PowerPoint 2013, users can open presentation files that conform to the OpenDocument format, as specified in [\[ODF\]](#), and create, open, or save presentation files that conform to the OpenDocument format, as specified in [\[ODF1.2\]](#), and pursuant to the implementation notes that are cited in section [4.4.4](#) of this document. By using PowerPoint 2013, if a document file conforms to the OpenDocument format, as specified in [\[ODF\]](#), is modified, it will be saved as the OpenDocument format, as specified in [\[ODF1.2\]](#).

4.4.3 File Name Extensions

Presentation files that conform to the OpenDocument format, as specified in [\[ODF\]](#) and [\[ODF1.2\]](#) and pursuant to the implementation notes that are cited in section [4.4.4](#) of this document, and were created by using a product version identified in section [4.4.2](#) typically have an .odp (OpenDocument format presentation) file name extension.

4.4.4 Reference Information

The OpenDocument format is specified in [\[ODF\]](#) and [\[ODF1.2\]](#). That specification includes relevant normative text and informative notes. It also provides the associated schema in Relax NG (.rng) format, which is described in [\[RELAXNG\]](#).

Implementation notes for the Microsoft Office 2013 implementation of the OpenDocument format are described in [\[MS-ODDF3\]](#). Implementation notes for the Microsoft Office 2007 Service Pack 2 (SP2) implementation of the OpenDocument format are described in [\[MS-ODDF\]](#). These notes describe how Office 2010, Microsoft Office 2013, and Office 2007 SP2 applications implement the format and they are organized according to sections of the OpenDocument format specification.

5 Change Tracking

This section identifies changes that were made to the [MS-OFFDI] protocol document between the July 2013 and November 2013 releases. Changes are classified as New, Major, Minor, Editorial, or No change.

The revision class **New** means that a new document is being released.

The revision class **Major** means that the technical content in the document was significantly revised. Major changes affect protocol interoperability or implementation. Examples of major changes are:

- A document revision that incorporates changes to interoperability requirements or functionality.
- The removal of a document from the documentation set.

The revision class **Minor** means that the meaning of the technical content was clarified. Minor changes do not affect protocol interoperability or implementation. Examples of minor changes are updates to clarify ambiguity at the sentence, paragraph, or table level.

The revision class **Editorial** means that the formatting in the technical content was changed. Editorial changes apply to grammatical, formatting, and style issues.

The revision class **No change** means that no new technical changes were introduced. Minor editorial and formatting changes may have been made, but the technical content of the document is identical to the last released version.

Major and minor changes can be described further using the following change types:

- New content added.
- Content updated.
- Content removed.
- New product behavior note added.
- Product behavior note updated.
- Product behavior note removed.
- New protocol syntax added.
- Protocol syntax updated.
- Protocol syntax removed.
- New content added due to protocol revision.
- Content updated due to protocol revision.
- Content removed due to protocol revision.
- New protocol syntax added due to protocol revision.
- Protocol syntax updated due to protocol revision.
- Protocol syntax removed due to protocol revision.

- Obsolete document removed.

Editorial changes are always classified with the change type **Editorially updated**.

Some important terms used in the change type descriptions are defined as follows:

- **Protocol syntax** refers to data elements (such as packets, structures, enumerations, and methods) as well as interfaces.
- **Protocol revision** refers to changes made to a protocol that affect the bits that are sent over the wire.

The changes made to this document are listed in the following table. For more information, please contact dochelp@microsoft.com.

Section	Tracking number (if applicable) and description	Major change (Y or N)	Change type
1.2.2 Informative References	Updated reference [MS-OODF2] to [MS-OODF3].	N	Content updated.
2.4.4 Reference Information	Updated reference [MS-OODF2] to [MS-OODF3].	N	Content updated.
3.3.2 Application and Versions	Removed redundant details concerning creation of spreadsheet files that conform to the Office Open XML File Format.	N	Content removed.
3.5.4 Reference Information	Updated reference [MS-OODF2] to [MS-OODF3].	N	Content updated.
4.2.2 Application and Versions	Removed redundant details concerning creation of presentation files that conform to the Office Open XML File Format.	N	Content removed.
4.4.4 Reference Information	Updated reference [MS-OODF2] to [MS-OODF3].	N	Content updated.
