# [MS-OXWSPSNTIF]: Push Notifications Web Service Protocol Specification

#### **Intellectual Property Rights Notice for Open Specifications Documentation**

- **Technical Documentation.** Microsoft publishes Open Specifications documentation for protocols, file formats, languages, standards as well as overviews of the interaction among each of these technologies.
- Copyrights. This documentation is covered by Microsoft copyrights. Regardless of any other terms that are contained in the terms of use for the Microsoft website that hosts this documentation, you may make copies of it in order to develop implementations of the technologies described in the Open Specifications and may distribute portions of it in your implementations using these technologies or your documentation as necessary to properly document the implementation. You may also distribute in your implementation, with or without modification, any schema, IDL's, or code samples that are included in the documentation. This permission also applies to any documents that are referenced in the Open Specifications.
- No Trade Secrets. Microsoft does not claim any trade secret rights in this documentation.
- Patents. Microsoft has patents that may cover your implementations of the technologies described in the Open Specifications. Neither this notice nor Microsoft's delivery of the documentation grants any licenses under those or any other Microsoft patents. However, a given Open Specification may be covered by Microsoft's Open Specification Promise (available here: <a href="http://www.microsoft.com/interop/osp">http://www.microsoft.com/interop/osp</a>) or the Community Promise (available here: <a href="http://www.microsoft.com/interop/cp/default.mspx">http://www.microsoft.com/interop/cp/default.mspx</a>). If you would prefer a written license, or if the technologies described in the Open Specifications are not covered by the Open Specifications Promise or Community Promise, as applicable, patent licenses are available by contacting iplg@microsoft.com.
- **Trademarks.** The names of companies and products contained in this documentation may be covered by trademarks or similar intellectual property rights. This notice does not grant any licenses under those rights.
- **Fictitious Names.** The example companies, organizations, products, domain names, e-mail addresses, logos, people, places, and events depicted in this documentation are fictitious. No association with any real company, organization, product, domain name, email address, logo, person, place, or event is intended or should be inferred.

**Reservation of Rights.** All other rights are reserved, and this notice does not grant any rights other than specifically described above, whether by implication, estoppel, or otherwise.

**Tools.** The Open Specifications do not require the use of Microsoft programming tools or programming environments in order for you to develop an implementation. If you have access to Microsoft programming tools and environments you are free to take advantage of them. Certain Open Specifications are intended for use in conjunction with publicly available standard specifications and network programming art, and assumes that the reader either is familiar with the aforementioned material or has immediate access to it.

# **Revision Summary**

Date	Revision History	Revision Class	Comments
07/15/2009	1.0	Major	Initial Availability.
11/04/2009	1.1.0	Minor	Updated the technical content.
02/10/2010	1.2.0	Minor	Updated the technical content.
05/05/2010	1.2.1	Editorial	Revised and edited the technical content.
08/04/2010	1.3	Minor	Clarified the meaning of the technical content.
11/03/2010	2.0	Major	Significantly changed the technical content.
03/18/2011	2.1	Minor	Clarified the meaning of the technical content.
08/05/2011	3.0	Major	Significantly changed the technical content.

#### 1 Introduction

The Push Notifications Web Service Protocol enables clients to receive subscribed event updates sent by the server.

Sections 1.8, 2, and 3 of this specification are normative and contain RFC 2119 language. Secitons 1.5 and 1.9 are also normative, but cannot contain RFC 2119 language. All other sections and examples in this specification are informative.

#### 1.1 Glossary

The following terms are defined in [MS-GLOS]:

Hypertext Transfer Protocol (HTTP)
Hypertext Transfer Protocol over Secure Sockets Layer (HTTPS)

The following terms are defined in [MS-OXGLOS]:

endpoint
SOAP action
SOAP body
SOAP header
Uniform Resource Locator (URL)
Web Services Description Language (WSDL)
WSDL message
WSDL port type
XML namespace
XML schema

The following terms are specific to this document:

MAY, SHOULD, MUST, SHOULD NOT, MUST NOT: These terms (in all caps) are used as described in <a href="[RFC2119]">[RFC2119]</a>. All statements of optional behavior use either MAY, SHOULD, or SHOULD NOT.

#### 1.2 References

#### 1.2.1 Normative References

We conduct frequent surveys of the normative references to assure their continued availability. If you have any issue with finding a normative reference, please contact <a href="mailto:dochelp@microsoft.com">dochelp@microsoft.com</a>. We will assist you in finding the relevant information. Please check the archive site, <a href="http://msdn2.microsoft.com/en-us/library/E4BD6494-06AD-4aed-9823-445E921C9624">http://msdn2.microsoft.com/en-us/library/E4BD6494-06AD-4aed-9823-445E921C9624</a>, as an additional source.

#### 1.3 Overview

The Push Notifications Web Service Protocol provides clients with subscribed event updates that are sent by the server. Clients subscribe to these notifications, as described in [MS-OXWSNTIF], by creating a push subscription that specifies where the server is to send notifications. The clients then create a Web service that enables them to receive the notifications sent to them by the server.

#### 1.4 Relationship to Other Protocols

A client that implements this protocol can use the Autodiscover Publishing and Lookup SOAP-Based Web Service Protocol, as described in <a href="MS-OXWSADISC">[MS-OXWSADISC</a>], or the Autodiscover Publishing and Lookup Protocol, as described in <a href="MS-OXDSCLI">[MS-OXDSCLI</a>], to identify the target **endpoint (4)** to use for each operation.

This protocol uses the SOAP Protocol, as described in [SOAP1.1], to specify the structure information exchanged between the client and server. This protocol uses the XML Protocol, as described in [XMLSCHEMA1] and [XMLSCHEMA2], to describe the message content sent to and from the server.

The Push Notifications Web Service Protocol uses SOAP over HTTP, as described in [RFC2616], and SOAP over HTTPS, as described in [RFC2818], as shown in the following layering diagram.

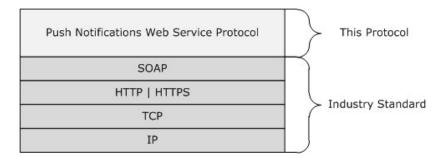

Figure 1: This protocol in relation to other protocols

The notification information that is sent to the Push Notifications Web Service Protocol is used when requests are made by using the Notifications Web Service Protocol [MS-OXWSNTIF].

#### 1.5 Prerequisties/Preconditions

The endpoint(4) **URL** that is returned by either the Autodiscover Publishing Lookup SOAP-Based Web Service Protocol, as described in [MS-OXWSADISC], or the Autodiscover Publishing and Lookup Protocol, as described in [MS-OXDSCLI], is required to form the **HTTP** request to the Web server that hosts this protocol. The operations that this protocol defines cannot be accessed unless the correct endpoint (4) is identified in the HTTP Web requests that target this protocol.

#### 1.6 Applicability Statement

The protocol specified in this document is applicable to tightly coupled client/server environments in which the client and the server are always connected. This protocol is not applicable to environments in which the client connects to the server periodically. If clients are loosely coupled with the server, the Notifications Web Service Protocol, as described in <a href="MS-OXWSNTIF">[MS-OXWSNTIF]</a>, is applicable.

## 1.7 Versioning and Capability Negotiation

This document covers versioning issues in the following areas:

- **Supported Transports:** This protocol uses multiple transports with SOAP 1.1, as specified in section 2.1 and in [SOAP1.1].
- Protocol Versions: This protocol specifies only one WSDL port type version. The WSDL version
  of the request is identified by using the t:RequestServerVersion element, as described in [MSOXWSCDATA] section 2.2.4.8.
- **Security and Authentication Methods:** This protocol relies on the Web server that is hosting it to perform authentication.
- **Localization:** This protocol includes text strings in various messages. Localization considerations for such strings are specified in section <u>3.1.4</u>.
- **Capability Negotiation**: This protocol does not support version negotiation.

#### 1.8 Vendor Extensible Fields

1.9	<b>Standards Assignments</b>
No	ne.

# 2 Messages

#### 2.1 Transport

The SOAP version supported is SOAP 1.1. For more details, see [SOAP1.1].

This protocol relies on the Web server that hosts the application to perform authentication. The protocol SHOULD use secure communications by means of HTTPS, as defined in <a href="[RFC2818]">[RFC2818]</a>.

#### 2.2 Common Message Syntax

This section contains common definitions that are used by this protocol. The syntax of the definitions uses **XML schema** as defined in [XMLSCHEMA1] and [XMLSCHEMA2], and **WSDL** as defined in [WSDL].

# 2.2.1 Namespaces

This specification defines and references various **XML namespaces** by using the mechanisms specified in [XMLNS]. Although this specification associates a specific XML namespace prefix for each XML namespace that is used, the choice of any particular XML namespace prefix is implementation-specific and not significant for interoperability.

Prefix	Namespace URI	Reference
soap	http://schemas.xmlsoap.org/wsdl/soap/	[SOAP1.1]
tns	http://schemas.microsoft.com/exchange/services/2006/messages	
S	http://www.w3.org/2001/XMLSchema	[XMLSCHEMA1]
targetNamespace	http://schemas.microsoft.com/exchange/services/2006/messages	
wsdl	http://schemas.xmlsoap.org/wsdl/	[WSDL]
t	http://schemas.microsoft.com/exchange/services/2006/types	

#### 2.2.2 Messages

This specification does not define any common WSDL message definitions.

#### 2.2.3 Elements

This specification does not define any common XML schema element definitions.

## 2.2.4 Complex Types

This specification does not define any common XML schema complex type definitions.

#### 2.2.5 Simple Types

This specification does not define any common XML schema simple type definitions.

#### 2.2.6 Attributes

This specification does not define any common XML schema attribute definitions.

# **2.2.7 Groups**

This specification does not define any common XML schema group definitions.

## 2.2.8 Attribute Groups

This specification does not define any common XML schema attribute group definitions.

## 2.2.9 Common Data Structures

This specification does not define any common XML schema data structures.

#### 3 Protocol Details

The client side of this protocol is simply a pass-through. That is, no additional timers or other state is required on the client side of this protocol. Calls made by the higher-layer protocol or application are passed directly to the transport, and the results that are returned by the transport are passed directly back to the higher-layer protocol or application.

#### 3.1 ExchangeServicePortType Server Details

The Push Notifications Web Service Protocol defines a single port type with one operation.

#### 3.1.1 Abstract Data Model

None.

#### **3.1.2 Timers**

None.

#### 3.1.3 Initialization

None.

#### 3.1.4 Message Processing Events and Sequencing Rules

The following table summarizes the WSDL operations as defined by this specification.

Operation name	Description
SendNotification	Sends subscription information from the server to the client application.

#### 3.1.4.1 SendNotification Operation

The **SendNotification** operation sends subscription information from the server to the client application.

The following is the WSDL port type specification for the **SendNotification** operation.

```
<wsdl:operation name="SendNotification">
    <wsdl:input message="tns:SendNotificationSoapIn" />
    <wsdl:output message="tns:SendNotificationSoapOut" />
</wsdl:operation>
```

The following is the WSDL binding specification for the **SendNotification** operation.

Release: Sunday, July 31, 2011

```
</wsdl:output>
</wsdl:operation>
```

#### 3.1.4.1.1 Messages

The following table lists and describes the WSDL message definitions that are specific to the **SendNotification** operation.

Message name	Description
SendNotificationSoapIn	Specifies a request to the <b>SendNotification</b> operation.
SendNotificationSoapOut	Specifies a response from the <b>SendNotification</b> operation.

#### 3.1.4.1.1.1 tns:SendNotificationSoapIn Message

The **SendNotificationSoapIn** WSDL message specifies the **SendNotification** operation request to send a notification to the client application.

The **SendNotificationSoapIn** WSDL message is the input message for the **SOAP action** http://schemas.microsoft.com/exchange/services/2006/messages/SendNotification.

The parts of the **SendNotificationSoapIn** WSDL message are listed and described in the following table.

Part name	Element/type	Description
request	tns:SendNotification (section 3.1.4.1.2.1)	Specifies the <b>SOAP body</b> of the request.
RequestVersion	t:RequestServerVersion ([MS- OXWSCDATA] section 2.2.4.8)	Specifies a <b>SOAP header</b> that identifies the schema version for the <b>SendNotification</b> operation request.

# 3.1.4.1.1.2 tns:SendNotificationSoapOut Message

The **SendNotificationSoapOut** WSDL message specifies the server response to the **SendNotification** operation request to send a notification to the client application.

The **SendNotificationSoapOut** WSDL message is the output message for the SOAP action http://schemas.microsoft.com/exchange/services/2006/messages/SendNotification.

The parts of the **SendNotificationSoapOut** WSDL message are listed and described in the following table.

12 / 27

[MS-OXWSPSNTIF] — v20110731 Push Notifications Web Service Protocol Specification

Copyright © 2011 Microsoft Corporation.

Release: Sunday, July 31, 2011

Part name	Element/type	Description
SendNotificationResult	tns:SendNotificationResult (section 3.1.4.1.2.2)	Specifies SOAP body of the response message.

#### 3.1.4.1.2 Elements

The following table lists and describes the XML schema element definitions that are specific to the **SendNotification** operation.

Element name Description	
SendNotification	Specifies the push notifications that are sent by the server to the client application.
SendNotificationResult	Specifies the response of a client application to a push notification.

#### 3.1.4.1.2.1 SendNotification Element

The **SendNotification** element specifies the push notifications that are sent by the server to the client application.

```
<xs:element name="SendNotification"
  type="m:SendNotificationResponseType"
/>
```

#### 3.1.4.1.2.2 SendNotificationResult Element

The **SendNotificationResul**t element specifies the response of a client application to a push notification.

```
<xs:element name="SendNotificationResult"
  type="m:SendNotificationResultType"
/>
```

# 3.1.4.1.3 Complex Types

The following table lists and describes the XML schema complex type definitions that are specific to the **SendNotification** operation.

Complex type name	Description
SendNotificationResponseMessageType	Specifies the status and result of a single <b>SendNotification</b> operation request.
SendNotificationResponseType	Specifies the push notifications that are sent by the server to the client application.
SendNotificationResultType	Specifies the response of a client application to a push notification.

#### 3.1.4.1.3.1 m:SendNotificationResponseMessageType Complex Type

The **SendNotificationResponseMessageType** complex type specifies the status and result of a single **SendNotification** operation request. The **SendNotificationResponseMessageType** complex type extends the **ResponseMessageType** complex type, as specified in <a href="MS-OXWSCDATA">[MS-OXWSCDATA</a>] section 2.2.3.52.

The following table lists and describes the child elements of the **SendNotificationResponseMessageType** complex type.

Element name	Туре	Description
Notification	t:NotificationType ([MS- OXWSNTIF] section 2.2.4.8)	Specifies the subscription and the events that have occurred since the last notification.

## 3.1.4.1.3.2 m:SendNotificationResponseType Complex Type

The **SendNotificationResponseType** complex type specifies the push notifications that are sent by the server to the client application. The **SendNotificationResponseType** complex type extends the **BaseResponseMessageType** complex type, as specified in <a href="MS-OXWSCDATA">[MS-OXWSCDATA]</a> section 2.2.3.15.

#### 3.1.4.1.3.3 m:SendNotificationResultType Complex Type

The **SendNotificationResultType** complex type specifies the response of a client application to a push notification.

<xs:complexType name="SendNotificationResultType">

        />
        </xs:sequence>
</xs:complexType>
```

The following table lists and describes the child elements of the **SendNotificationResultType** complex type.

Element name	Туре	Description
SubscriptionStatus	t:SubscriptionStatusType (section 3.1.4.1.4.1)	Specifies the status of a push subscription.

### **3.1.4.1.4** Simple Types

The following table lists and describes the XML schema simple type definitions that are specific to the **SendNotification** operation.

Simple type name	Description
SubscriptionStatusType	Specifies the status type of a push subscription.

# 3.1.4.1.4.1 t:SubscriptionStatusType Simple Type

The **SubscriptionStatusType** simple type specifies the status of a push subscription.

The following table lists and describes the values that are defined by the **SubscriptionStatusType** simple type.

Value name	Description
ок	Specifies that the server will continue to send notifications.
Unsubscribe	Specifies that the server will stop sending notifications and end the subscription.

## 3.1.5 Timer Events

None.

## 3.1.6 Other Local Events

# 4 Protocol Examples

# **5** Security

# **5.1 Security Considerations for Implementers**

None.

# 6 Appendix A: Full WSDL

The XML files that are listed in the following table are required in order to implement the functionality described in this document.

File name	Description	Section
MS-OXWSPSNTIF.wsdl	Contains the WSDL for the implementation of this protocol.	<u>6</u>
MS-OXWSPSNTIF- messages.xsd	Contains the XML schema message definitions that are used in this protocol.	<u>7.1</u>
MS-OXWSPSNTIF-types.xsd	Contains the XML schema type definitions that are used in this protocol.	<u>7.2</u>

These files have to be placed in a common folder in order for the WSDL to validate and operate. Also, any schema files that are included in or imported into the MS-OXWSPSNTIF-types.xsd or MS-OXWSPSNTIF-messages.xsd schemas have to be placed in the common folder along with the files listed in the table.

This section provides the contents of the MS-OXWSPSNTIF.wsdl file.

```

# 7 Appendix B: Full XML Schema

For ease of implementation, the following sections provide the full XML schema for this protocol.

Schema name	Prefix	Section
Messages schema	m:	<u>7.1</u>
Types schema	t:	<u>7.2</u>

These files have to be placed in a common folder in order for the WSDL to validate and operate. Also, any schema files that are included in or imported into the MS-OXWSPSNTIF-types.xsd or MS-OXWSPSNTIF-messages.xsd schemas have to be placed in the common folder along with the files listed in the table.

#### 7.1 Messages Schema

This section provides the contents of the MS-OXWSPSNTIF-messages.xsd file and information about additional files that this schema file requires to operate correctly.

MS-OXWSPSNTIF-messages.xsd includes the files listed in the following table. To operate correctly, these files have to be in the folder that contains the WSDL, types schema, and messages schema files for this protocol.

File name	Defining specification
MS-OXWSCDATA-messages.xsd	[MS-OXWSCDATA] section 7.1
MS-OXWSNTIF-types.xsd	[MS-OXWSNTIF] section 7.2

```
<?xml version="1.0" encoding="utf-8"?>
<xs:schema xmlns:m="http://schemas.microsoft.com/exchange/services/2006/messages"</pre>
xmlns:tns="http://schemas.microsoft.com/exchange/services/2006/messages"
xmlns:t="http://schemas.microsoft.com/exchange/services/2006/types"
xmlns:xs="http://www.w3.org/2001/XMLSchema"
targetNamespace="http://schemas.microsoft.com/exchange/services/2006/messages"
elementFormDefault="qualified" version="Exchange2010" id="messages">
     <xs:import namespace="http://schemas.microsoft.com/exchange/services/2006/types"</pre>
schemaLocation="MS-OXWSNTIF-types.xsd"/>
     <xs:import namespace="http://schemas.microsoft.com/exchange/services/2006/types"</pre>
schemaLocation="MS-OXWSPSNTIF-types.xsd"/>
     <xs:include schemaLocation="MS-OXWSCDATA-messages.xsd"/>
     <xs:complexType name="SendNotificationResponseMessageType">
          <xs:complexContent>
               <xs:extension base="m:ResponseMessageType">
                    <xs:sequence>
                         <xs:element name="Notification" type="t:NotificationType"/>
               </xs:extension>
          </xs:complexContent>
     </xs:complexTvpe>
     <xs:complexType name="SendNotificationResponseType">
          <xs:complexContent>
               <xs:extension base="m:BaseResponseMessageType"/>
          </xs:complexContent>
     </xs:complexType>
     <xs:element name="SendNotification" type="m:SendNotificationResponseType"/>
```

#### 7.2 Types Schema

This section provides the contents of the MS-OXWSPSNTIF-types.xsd file.

# 8 Appendix C: Product Behavior

The information in this specification is applicable to the following Microsoft products or supplemental software. References to product versions include released service packs:

- Microsoft® Exchange Server 2007
- Microsoft® Exchange Server 2010

Exceptions, if any, are noted below. If a service pack or Quick Fix Engineering (QFE) number appears with the product version, behavior changed in that service pack or QFE. The new behavior also applies to subsequent service packs of the product unless otherwise specified. If a product edition appears with the product version, behavior is different in that product edition.

Unless otherwise specified, any statement of optional behavior in this specification that is prescribed using the terms SHOULD or SHOULD NOT implies product behavior in accordance with the SHOULD or SHOULD NOT prescription. Unless otherwise specified, the term MAY implies that the product does not follow the prescription.

# 9 Change Tracking

This section identifies changes that were made to the [MS-OXWSPSNTIF] protocol document between the March 2011 and August 2011 releases. Changes are classified as New, Major, Minor, Editorial, or No change.

The revision class **New** means that a new document is being released.

The revision class **Major** means that the technical content in the document was significantly revised. Major changes affect protocol interoperability or implementation. Examples of major changes are:

- A document revision that incorporates changes to interoperability requirements or functionality.
- An extensive rewrite, addition, or deletion of major portions of content.
- The removal of a document from the documentation set.
- Changes made for template compliance.

The revision class **Minor** means that the meaning of the technical content was clarified. Minor changes do not affect protocol interoperability or implementation. Examples of minor changes are updates to clarify ambiguity at the sentence, paragraph, or table level.

The revision class **Editorial** means that the language and formatting in the technical content was changed. Editorial changes apply to grammatical, formatting, and style issues.

The revision class **No change** means that no new technical or language changes were introduced. The technical content of the document is identical to the last released version, but minor editorial and formatting changes, as well as updates to the header and footer information, and to the revision summary, may have been made.

Major and minor changes can be described further using the following change types:

- New content added.
- Content updated.
- Content removed.
- New product behavior note added.
- Product behavior note updated.
- Product behavior note removed.
- New protocol syntax added.
- Protocol syntax updated.
- Protocol syntax removed.
- New content added due to protocol revision.
- Content updated due to protocol revision.
- Content removed due to protocol revision.
- New protocol syntax added due to protocol revision.

- Protocol syntax updated due to protocol revision.
- Protocol syntax removed due to protocol revision.
- New content added for template compliance.
- Content updated for template compliance.
- Content removed for template compliance.
- Obsolete document removed.

Editorial changes are always classified with the change type Editorially updated.

Some important terms used in the change type descriptions are defined as follows:

- **Protocol syntax** refers to data elements (such as packets, structures, enumerations, and methods) as well as interfaces.
- Protocol revision refers to changes made to a protocol that affect the bits that are sent over the wire.

The changes made to this document are listed in the following table. For more information, please contact <a href="mailto:protocol@microsoft.com">protocol@microsoft.com</a>.

Section	Tracking number (if applicable) and description	Major change (Y or N)	Change type
1 Introduction	Added information about which sections of the specification are normative and can contain RFC 2119 language.	Y	New content added for template compliance.
2.2.2 Messages	Changed "XML schema message" to "WSDL message"	N	Content updated for template compliance.
6 Appendix A: Full WSDL	Moved WSDL content from section 6.1 to this section.	N	Content updated for template compliance.
Z Appendix B: Full XML Schema	Added new section.	N	New content added for template compliance.
7.1 Messages Schema	Added new section and moved content from section 6.2 to this section.	N	New content added for template compliance.
7.2 Types Schema	Added new section and moved content from section 6.3 to this section.	N	New content added for template compliance.
	Removed section 6.1, 6.2 and 6.3.	N	Content removed for template compliance.

Glossary 5 Groups 10  I Implementer - security considerations 18 Index of security parameters 18	Security implementer considerations 18 parameter index 18 Sequencing rules server 11 Server abstract data model 11
Glossary 5 Groups 10  I Implementer - security considerations 18 Index of security parameters 18 Informative references 6 Initialization	Security implementer considerations 18 parameter index 18 Sequencing rules server 11 Server abstract data model 11 initialization 11 local events 16
Glossary 5 Groups 10  I Implementer - security considerations 18 Index of security parameters 18 Informative references 6 Initialization server 11	Security implementer considerations 18 parameter index 18 Sequencing rules server 11 Server abstract data model 11 initialization 11 local events 16 message processing 11
Glossary 5 Groups 10  I  Implementer - security considerations 18 Index of security parameters 18 Informative references 6 Initialization server 11 Introduction 5	Security implementer considerations 18 parameter index 18 Sequencing rules server 11 Server abstract data model 11 initialization 11 local events 16 message processing 11 SendNotification Operation operation 11 sequencing rules 11
Glossary 5 Groups 10  I  Implementer - security considerations 18 Index of security parameters 18 Informative references 6 Initialization server 11 Introduction 5  L	Security implementer considerations 18 parameter index 18 Sequencing rules server 11 Server abstract data model 11 initialization 11 local events 16 message processing 11 SendNotification Operation operation 11 sequencing rules 11 timer events 16 timers 11
Glossary 5 Groups 10  I  Implementer - security considerations 18 Index of security parameters 18 Informative references 6 Initialization server 11 Introduction 5  L  Local events	Security implementer considerations 18 parameter index 18 Sequencing rules server 11 Server abstract data model 11 initialization 11 local events 16 message processing 11 SendNotification Operation operation 11 sequencing rules 11 timer events 16 timers 11 Simple types 9
Glossary 5 Groups 10  I  Implementer - security considerations 18 Index of security parameters 18 Informative references 6 Initialization server 11 Introduction 5  L  Local events server 16	Security implementer considerations 18 parameter index 18 Sequencing rules server 11 Server abstract data model 11 initialization 11 local events 16 message processing 11 SendNotification Operation operation 11 sequencing rules 11 timer events 16 timers 11 Simple types 9 Standards assignments 8 Syntax
Glossary 5 Groups 10  I  Implementer - security considerations 18 Index of security parameters 18 Informative references 6 Initialization     server 11 Introduction 5  L  Local events     server 16  M	Security implementer considerations 18 parameter index 18 Sequencing rules server 11 Server abstract data model 11 initialization 11 local events 16 message processing 11 SendNotification Operation operation 11 sequencing rules 11 timer events 16 timers 11 Simple types 9 Standards assignments 8 Syntax messages - overview 9
Glossary 5 Groups 10  I  Implementer - security considerations 18 Index of security parameters 18 Informative references 6 Initialization server 11 Introduction 5  L  Local events server 16  M  Message processing	Security implementer considerations 18 parameter index 18 Sequencing rules server 11 Server abstract data model 11 initialization 11 local events 16 message processing 11 SendNotification Operation operation 11 sequencing rules 11 timer events 16 timers 11 Simple types 9 Standards assignments 8 Syntax
Glossary 5 Groups 10  I  Implementer - security considerations 18 Index of security parameters 18 Informative references 6 Initialization     server 11 Introduction 5  L  Local events     server 16  M  Message processing     server 11 Messages	Security implementer considerations 18 parameter index 18 Sequencing rules server 11 Server abstract data model 11 initialization 11 local events 16 message processing 11 SendNotification Operation operation 11 sequencing rules 11 timer events 16 timers 11 Simple types 9 Standards assignments 8 Syntax messages - overview 9  T Timer events
Glossary 5 Groups 10  I  Implementer - security considerations 18 Index of security parameters 18 Informative references 6 Initialization     server 11 Introduction 5  L  Local events     server 16  M  Message processing     server 11 Messages     attribute groups 10	Security implementer considerations 18 parameter index 18 Sequencing rules server 11 Server abstract data model 11 initialization 11 local events 16 message processing 11 SendNotification Operation operation 11 sequencing rules 11 timer events 16 timers 11 Simple types 9 Standards assignments 8 Syntax messages - overview 9  T
Glossary 5 Groups 10  I  Implementer - security considerations 18 Index of security parameters 18 Informative references 6 Initialization     server 11 Introduction 5  L  Local events     server 16  M  Message processing     server 11 Messages	Security implementer considerations 18 parameter index 18 Sequencing rules server 11 Server abstract data model 11 initialization 11 local events 16 message processing 11 SendNotification Operation operation 11 sequencing rules 11 timer events 16 timers 11 Simple types 9 Standards assignments 8 Syntax messages - overview 9  T Timer events server 16

Release: Sunday, July 31, 2011

Transport 9
Types
complex 9
simple 9
